Stabilizing a Struggling Facility with Quality Clinicians

WITH PERMANENT SOLUTIONS

THE CLIENT

A top-ranked, multi-site facility on the East Coast

THE PROBLEM

Extreme staffing shortages and high turnover, leading to bed closures

THE PROLINK SOLUTION

Proactively sourcing and delivering quality talent with improved recruiting and clinical vetting

From January 2024 to
April 2025:

120+
RNs placed

\$18M
in total cost
savings

Stronger Sourcing

By taking a hands-on approach to sourcing and delivering quality talent, Prolink expedited the hiring process and delivered a high volume of clinicians in a relatively short timeframe. Prolink's involvement also enabled the health system's HR team to focus on competing priorities at other locations.

Clinical Quality

Prolink emphasized behavioral screening in the talent sourcing process, ensuring the clinicians placed were of the highest quality. The injection of fresh, well-vetted talent reduced the strain on current staff and allowed for an improved standard of care.

Financial Stability

The high volume of direct hires provided by Prolink not only delivered significant contingent labor savings—it also allowed the struggling facility to re-open beds it previously had to close, increasing revenue.
